INTENDED USE

Website / Download

ISSUED BY

Shaanxi Filture New Material Co., Ltd.

Executive Summary

We maintain an ongoing review process for raw material information, supplier declarations, and applicable regulatory updates. This page is intended to support customer review, procurement reference, and public website disclosure.

REGULATORY FOCUS

REACH Regulation (EC) No 1907/2006 and subsequent amendments, including SVHC-related obligations.

INDUSTRY SCOPE

Metal filter elements, sintered metal filtration materials, and related metal components.

Scope of Products

Metal filter elements

Sintered metal filtration materials

Stainless steel, nickel-based, titanium, and other metal filtration components

Other standard products confirmed by both parties to fall within this declaration scope

For custom-made products, specially surface-treated products, or products manufactured to customer-designated material specifications, specific compliance requirements remain subject to separately agreed documents or technical order requirements.

Compliance Statement

- 1 We continuously monitor updates to the REACH Regulation and incorporate relevant requirements into our supply chain compliance management process.
- 2 For products within the scope of this declaration, we review available material information, supplier declarations, and other necessary compliance-related documentation as applicable.
- 3 If any product contains an SVHC at or above the legal communication threshold of **0.1% w/w**, we will provide the necessary information to customers in accordance with applicable legal requirements.
- 4 Based on the information currently available to us, and unless otherwise stated in writing, our standard products are not intentionally formulated with substances restricted under REACH in excess of applicable restriction limits.
- 5 If future updates to the REACH Candidate List, Authorisation List, or Restriction List affect product compliance status, we will assess such changes within a reasonable commercial timeframe and update this declaration where necessary.

Notes and Limitations

- › This declaration is based on the supply chain information, raw material documentation, and routine technical records currently available to us.
- › This document is a general compliance statement intended for public website use and does not replace a product-specific compliance confirmation.
- › For specific product, batch, application, or regulatory version requests, targeted support documentation can be provided before purchase.
- › For custom products, special coatings, welded assemblies, sealing components, or composite assemblies, a separate confirmation may be required.
- › This declaration does not constitute a legal guarantee for undeclared use, unspecified application environments, or subsequent third-party processing.

Important Note: Customer-specific projects or mixed-material assemblies may require a separate product-level compliance review.
